

Remote Full-Stack Dev & Tech SEO Specialist

Summary

Remote-ready Full-Stack Developer specializing in SEO-focused web applications using Next.js and Django. Experienced in technical SEO, dynamic metadata, search optimization, and performance-focused development for SaaS, AI, Web3, and e-commerce platforms since 2019.

Skilled with Google Search Console, Ahrefs, and Google Analytics, with strong knowledge of SEO-friendly rendering, Core Web Vitals, and user-focused optimization.

Professional Experience

Full-Stack Developer

Freelance / Contract | 2019 – Present

- Built full-stack web applications for startups, crypto platforms, SaaS products, and e-commerce businesses.
- Developed responsive frontend systems and scalable backend APIs.
- Implemented SEO-friendly page structures, metadata optimization, and semantic HTML.
- Increased indexed product pages through sitemap and metadata optimization.
- Worked with clients to build production-ready web systems and user-focused digital products.

Key Contributions

- Built e-commerce platforms with SEO-optimized product pages and structured data (JSON-LD).
- Implemented dynamic SEO metadata, Open Graph, Twitter Cards, and schema markup using Next.js.
- Configured Google Search Console, sitemap indexing, crawlability, and canonical setup.
- Researched keywords and optimized content structure for SERP visibility and discoverability.
- Improved Core Web Vitals through image optimization, lazy loading, and mobile-first optimization.
- Developed AI-integrated systems, dashboards, and payment platforms.

Additional Skills

- Frontend: Next.js, React Native, Expo, TypeScript, WordPress, Shopify
- Backend: Django, Django REST Framework
- SEO Tools: Google Search Console, Google Analytics, Ahrefs, Google
- UI/UX & Design: Figma, Tailwind CSS, ShadCN, Adobe After Effects
- Cloud & Tools: AWS, Google Cloud, Cloudinary, Firebase
- Integrations: Stripe, MetaMask, ChatGPT API
- Version Control: Git
